In points of argument

Arguments for (or against) Fixed Income Markets

Pasar masih mengekspektasikan penurunan pada tren suka bunga the Fed sebanyak tiga kali.

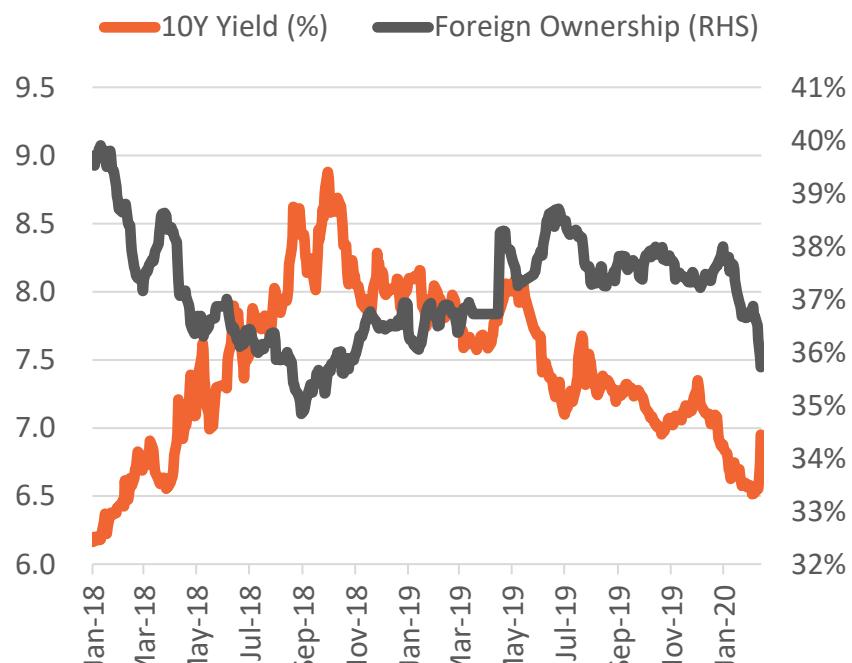

Isu global yang akan mempengaruhi secara signifikan adalah potensi perlambatan ekonomi akibat Covid-19. Stimulus yang dicanangkan oleh negara-negara menentukan kembalinya pertumbuhan ekonomi.

Arus keluar investor asing cukup signifikan. Pasar obligasi akan ditentukan oleh bantuan stabilisasi BI dan potensi kembalinya investor asing.

- ⚠ Dengan menggunakan asumsi *fair level* Rupiah di IDR14,200 – 14,500 dan imbal hasil UST 10 yr di 2%, kami memperkirakan level imbal hasil obligasi pemerintah 10 tahun di 6.6 - 6.8%
- ⚠ Melihat volatilitas pasar obligasi akan tetap tinggi dalam beberapa bulan ke depan dan imbal hasil tenor 10 tahun yang sudah cukup *fairly valued*, kami merekomendasikan durasi netral untuk portofolio obligasi.
