

Monthly Bulletin

April 2020

What's Inside

Calendar

US Initial Jobless Claim (11,18,25-Apr)
ID Trade Balance (15-Apr)
CN PMI Mfg. (30-Mar)

Global Event

Regional Eropa memperlihatkan tanda-tanda perlambatan penyebaran virus corona . Hal ini menyebabkan meningkatnya investor *appetite* secara umum.

Indonesia

Pemerintah baru saja mengeluarkan Perppu 1/2020 yang menjadi dasar dalam mengeluarkan kebijakan fiskal sebesar 405trn dan beberapa kebijakan lainnya terkait penanganan pandemik *coronavirus*

Equity Market

Kinerja IHSG ditutup sebesar -27.95% YTD (*cutoff date: 31 mar 2020*). Hal ini disebabkan oleh sentimen negatif terkait dampak *outbreak* yang terjadi di US di bulan maret. Di bulan Maret, sektor barang konsumsi memiliki kinerja terbaik dimana sektor aneka industry mencatatkan kinerja penurunan yang paling buruk

Fixed Income Market

Yield 10 tahun obligasi Indonesia ditutup di level 7.9% pada akhir Maret 2020. Kepemilikan investor asing menurun signifikan selama bulan maret, disaat yang bersamaan, BI melakukan penambahan porsi kepemilikan atas surat utang negara.

Tracking the Covid-19 Growth Globally

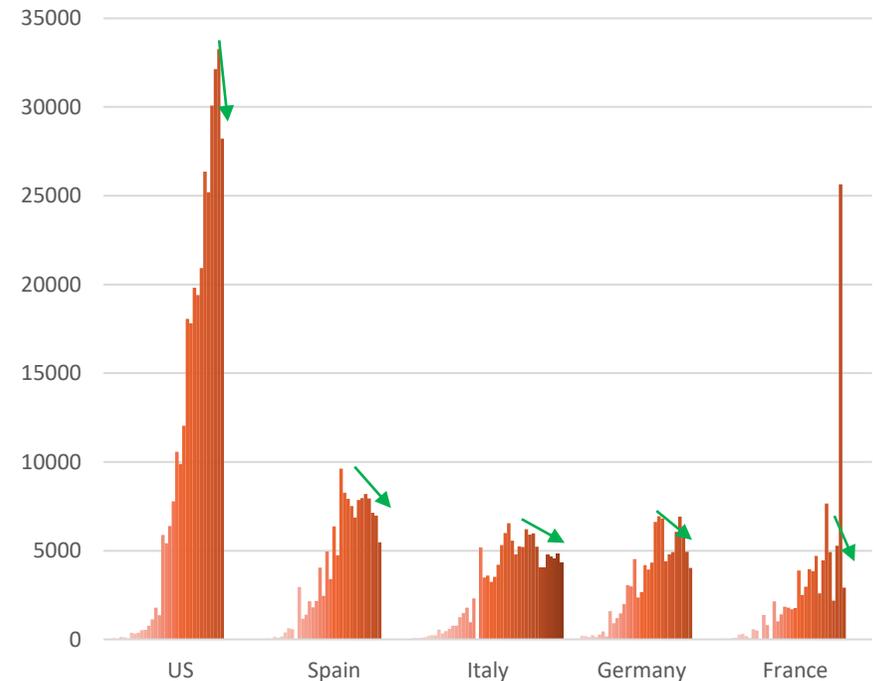

The Infection growth is slowing down

Confirmed Cases Growth (Global, China, Global ex-China)
In 5D average growth %

Sumber: JHU

Daily New Cases in Top 5 Countries ex-China
In daily changes of confirmed cases

Sumber: JHU

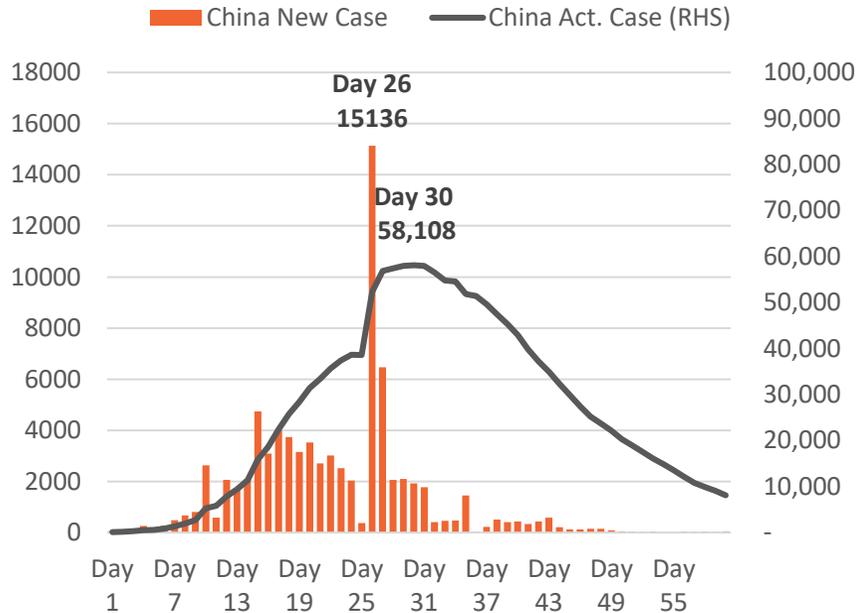

- 🚩 Covid-19 merupakan penyakit menular yang menyerang sistem pernafasan manusia yang disebabkan oleh *SARS-Cov-2* (Severe acute respiratory syndrome coronavirus 2) atau disingkat *coronavirus*. Tingkat penyebaran *covid-19* sangat cepat hampir seluruh kawasan negara telah terkena. Per 5-Apr-2020, terlihat pertumbuhan global-ex china sudah melandai. Hal ini juga terefleksi pada top 5 negara dengan kasus tertinggi menunjukkan tanda-tanda penurunan kasus baru yang positif.

New Cases Peak varies between 2 – 4 weeks

Observation from Country that have contained diseases

Contained Country Profile – China

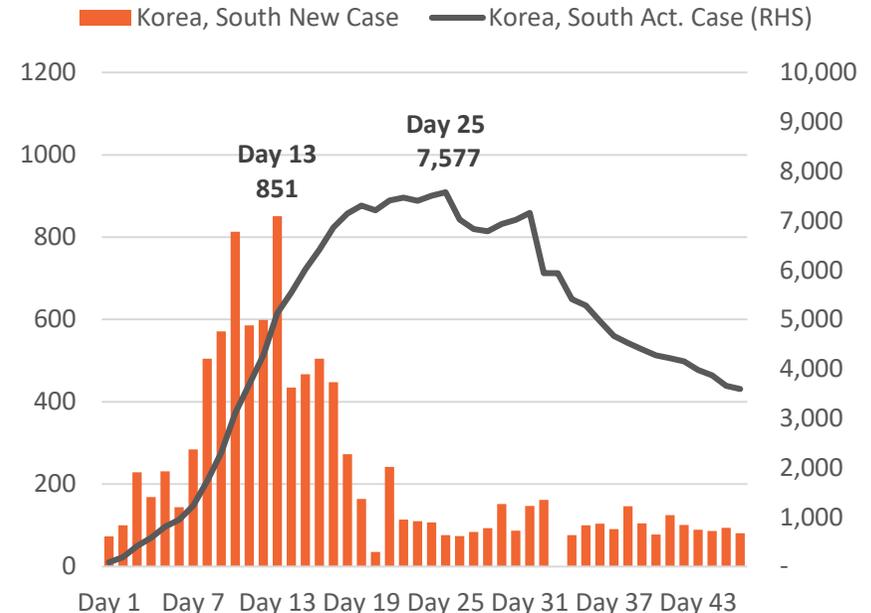

Daily of new cases, since 1st day of 100 conf. cases

Sumber: JHU

Contained Country Profile – South Korea

Daily of new cases, since 1st day of 100 conf. cases

Sumber: JHU

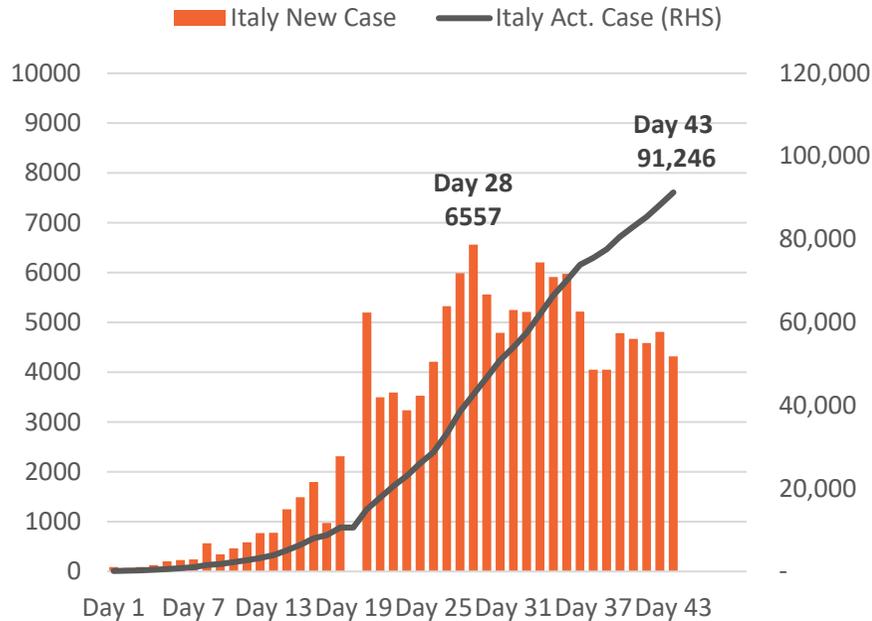

- ⚠️ Kesiapan pemerintah terkait dengan *public health policy* sangat berpengaruh kepada tingkat penyebaran *covid-19*. Dua negara diatas melakukan kebijakan yang berbeda. 1) China : *mass-scale movement restriction* sejak 26-Jan-2020 (*lockdown* provinsi hubei, dll), 2) . Kebijakan yang tepat dapat menekan laju infeksi dan menurunkan penyebaran dalam waktu 2 – 4 minggu. Asia Utara secara umum lebih siap menghadapi wabah mengingat pengalaman, kapasitas layanan kesehatan, dan juga kesiapan sosial dan ekonomi.

European Regions have show some peaking case

Yet its active case still to be followed in few next week

Potential Peaking Country - Italy

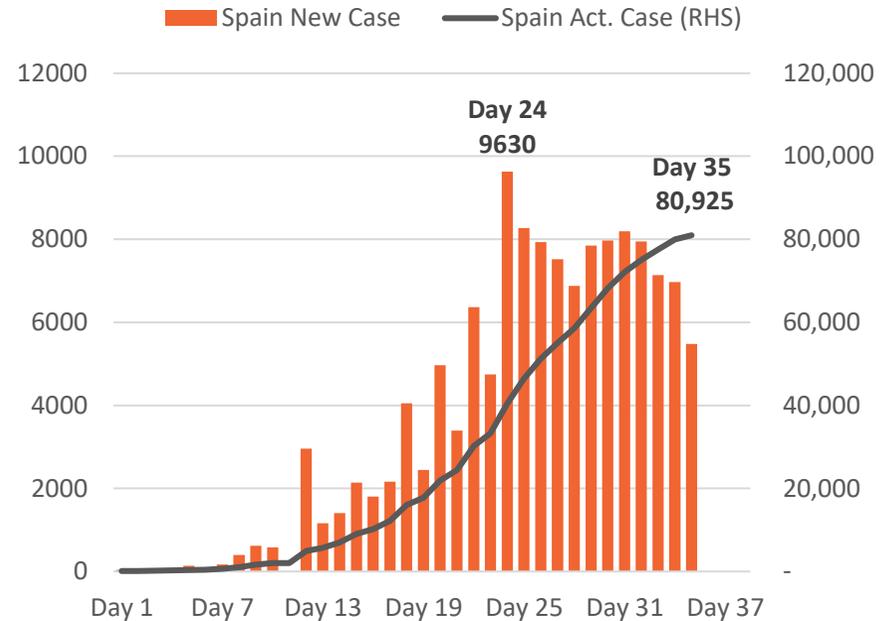

Daily of new cases, since 1st day of 100 conf. cases

Sumber: JHU

Potential Peaking Country - Spain

Daily of new cases, since 1st day of 100 conf. cases

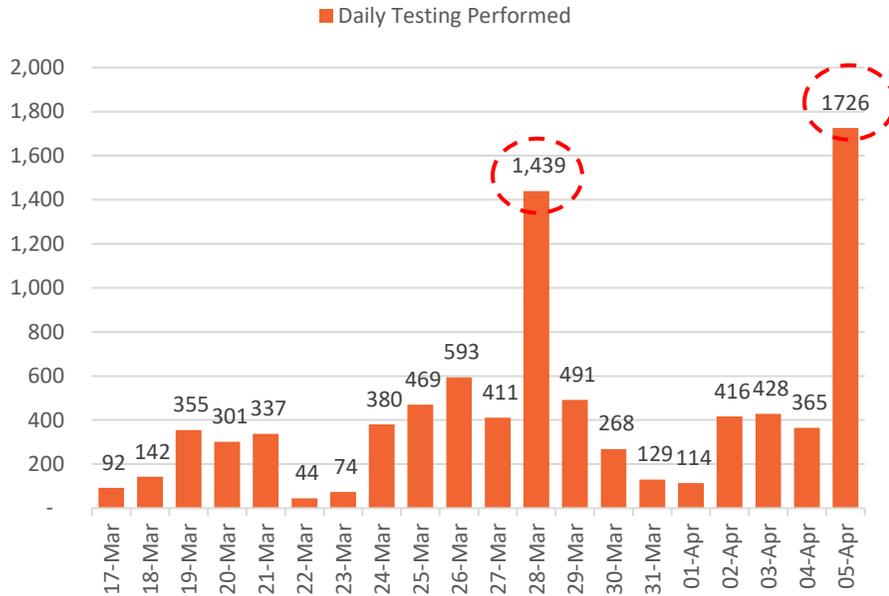

Sumber: JHU

- Adapun wilayah eropa yang terlihat mendekati puncak dari infeksi *covid-19*. Terlihat dari kasus positif yang telah dikonfirmasi menurun sejak hari ke-28 untuk Italy dan hari ke-24 untuk Spanyol. Walaupun pasien yang masih dalam pengobatan (*active case*) belum memperlihatkan penurunan.

Indonesia had a Jump in Covid-19 Testing

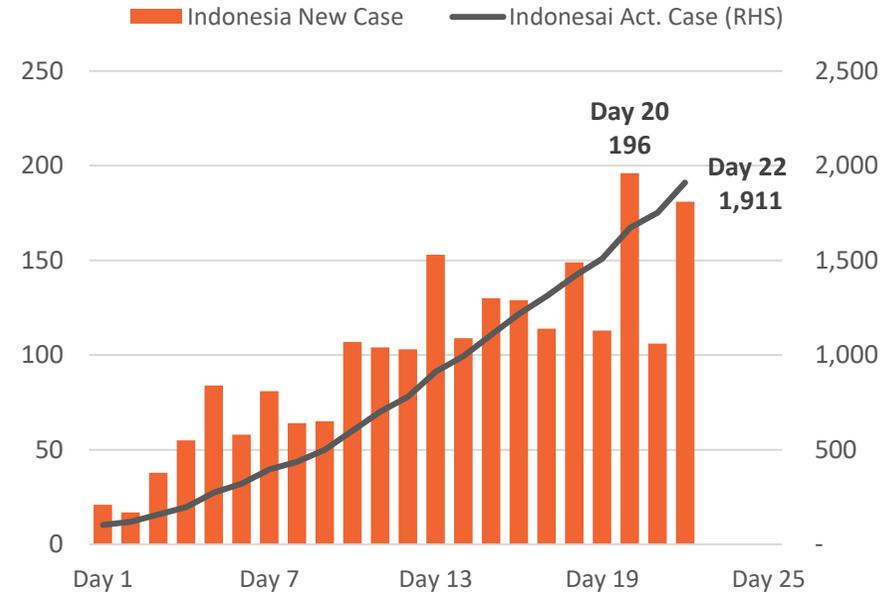

Yet Indonesia hasn't show any peaking pattern both on new cases or active case

Daily Testing Performed in Indonesia
In times of covid-19 testing

Sumber: CLSA

Indonesia hasn't show any peaking pattern yet
Daily of new cases, since 1st day of 100 conf. cases

Sumber: JHU

- ⚠ Berdasarkan 4 contoh negara sebelumnya, kita dijadikan dasar untuk menaruh ekspektasi terhadap Indonesia. Dimana best scenario masa penyebaran bisa berakhir di minggu 4. Namun, Indonesia baru saja meningkatkan kapasitas testing terlihat dari grafik sebelah kiri, sehingga puncak infeksi untuk di Indonesia masih perlu di lihat dalam beberapa waktu kedepan.

Sumber: *CLSA projection, Syailendra Research

- Bank sentral di dunia telah melakukan kebijakan stimulus demi menjaga pertumbuhan ekonomi global. Indonesia telah memangkas suku bunga sebesar 50 bps dan diperkirakan untuk kembali memangkas sebesar 50 hingga akhir tahun.

Few Selected Detailed Monetary Policy

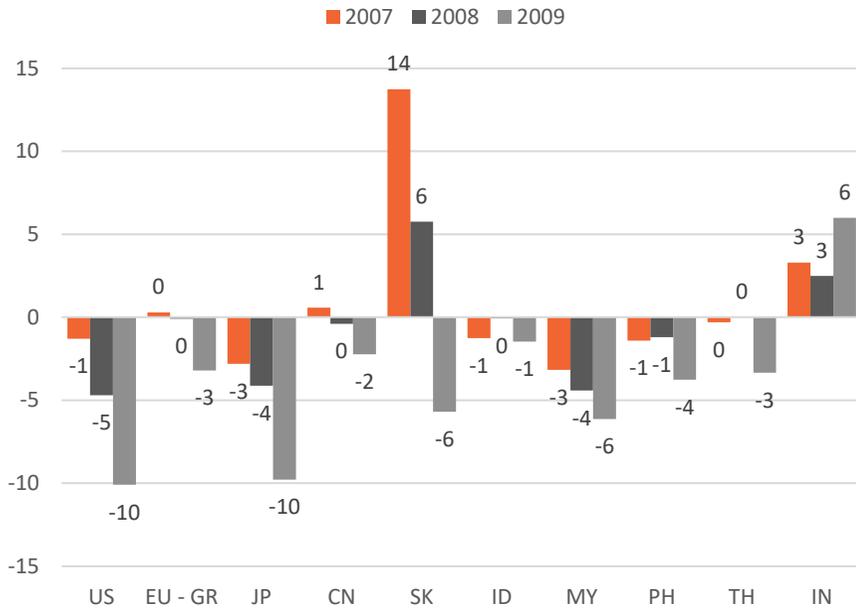

Monetary policy per country

Monetary Impact ex-Policy Rate	
China	Liquidity injection into the banking system
	Expansion of re-lending and re-discounting facilities
	Targeted RRR cuts by 50-100 bps and an additional 100 bps for eligible joint-stock banks to support private SMEs
US	Unlimited purchase of Treasury and agency securities
	Expanded overnight and term repos. Lowered cost of discount window lending
	Reduced existing cost of swap lines with major central banks and extended the maturity of FX operations; broadened U.S. dollar swap lines to more central banks
ECB	Additional asset purchases of €120 billion until end-2020
	Providing temporarily additional auctions of the full-allotment, fixed rate temporary liquidity facility at the deposit facility rate
IDN	Lowering reserve requirement ratios
	Increasing the maximum duration for repo and reverse repo operations (up to 12 months)
	Introducing daily repo auctions
	Increasing the frequency of FX swap auctions for 1, 3, 6 and 12 month tenors from three times per week to daily auctions
	Increasing the size of the main weekly refinancing operations as needed

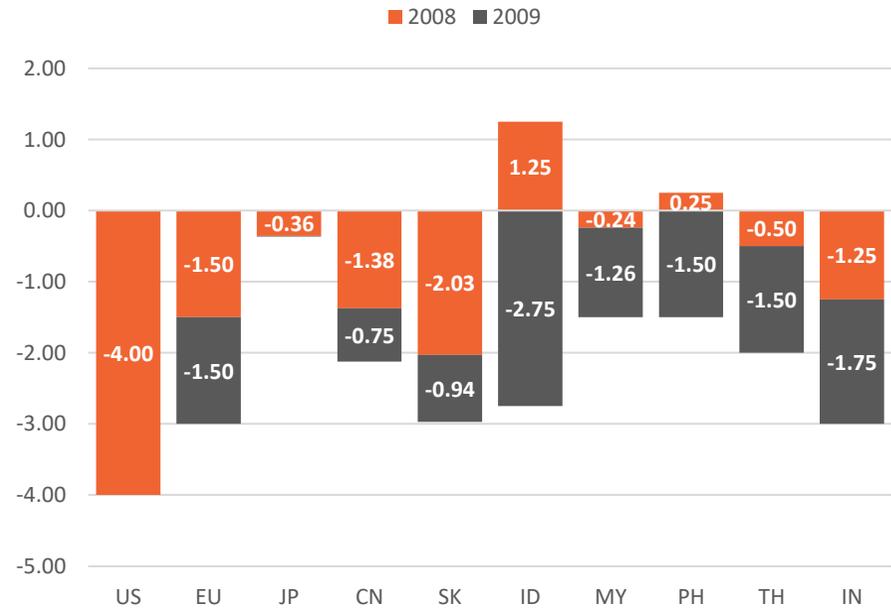

Looking Government Roles in 2008

In %

Source: Bloomberg, Syailendra research

- ▲ Hal ini masih terjadi dengan peningkatan kepemilikan BI pada obligasi negara yang mencatatkan perubahan +6.3% dalam satu tahun terakhir menjadi 15%.

Government Bond Outlook

Balanced upside-downside risk

Expectation Related to Indonesia Bonds

In points of argument

Arguments for (or against) Fixed Income Markets

Ekonomi global akan melambat akibat Covid-19. Stimulus yang dicanangkan oleh negara-negara menentukan kembalinya pertumbuhan ekonomi.

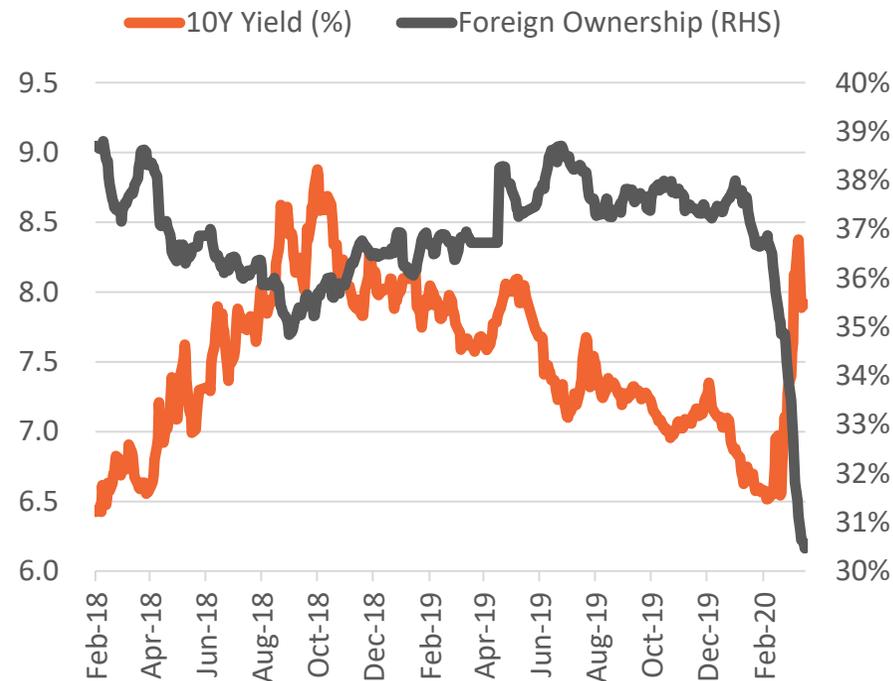

Arus keluar investor asing cukup signifikan. Namun, intervensi BI akan membantu menjaga kestabilan imbal hasil obligasi.

Pasar masih mencoba mengestimasi dampak kenaikan defisit anggaran menjadi 5% selama beberapa tahun ke depan terhadap level imbal hasil obligasi pemerintah dalam jangka waktu menengah.

- ⚠ Dengan menggunakan asumsi *fair level* Rupiah di IDR14,800 – 15,400 dan imbal hasil UST 10 yr di 2%, kami memperkirakan level imbal hasil obligasi pemerintah 10 tahun di 7.7 – 8.3%
- ⚠ Volatilitas pasar obligasi akan tetap tinggi dalam beberapa bulan ke depan. Namun, imbal hasil tenor 10 tahun sudah cukup *fairly valued*. Kami merekomendasikan durasi netral untuk portofolio obligasi.

Equity Strategy

Expecting positive improvement ahead

Arguments for Equity Market

Penurunan pasar yang cukup dalam akibat kekhawatiran investor terhadap dampak virus corona menyebabkan valuasi saham menjadi menarik dengan mempertimbangkan pertumbuhan jangka menengah.

Penurunan bersifat sementara, karena tidak adanya perubahan secara fundamental terhadap perekonomian Indonesia secara jangka panjang.

Kebijakan pemerintah dalam pemberian stimulus dapat membantu perekonomian dalam waktu dekat. Disaat yang bersamaan, Pemerintahan presiden Jokowi tetap berencana untuk memunculkan reformasi guna menarik investasi asing i.e : *omnibus tax law, labor reform*.

Posisi investor asing yang relatif minim dalam 3 tahun terakhir, valuasi yang sangat atraktif harusnya mengundang investor untuk kembali berinvestasi pada pasar saham Indonesia.

- 🔺 Kami melihat baik di level global ataupun domestik terdapat perbaikan dari sisi sentimen investor atas ketidakpastian dan *recovery* laba atas beberapa sektor. Hal ini selayaknya dapat memberikan *support* bagi IHSG.
- 🔺 Kami mengasumsikan pertumbuhan laba 2020F dikisaran : 0%-3% dengan P/E dikisaran 13-15x. Target JCI 2020F berkisar pada 5,300 – 5,700

Arguments Against Equity Market – and Why We Think It Is In the Price

Dampak dari virus Corona terhadap pertumbuhan ekonomi dunia dan domestik masih belum bisa dipastikan besarnya, namun pastinya negatif. Risiko penyebaran *covid-19* yang berkepanjangan dapat mengakibatkan dampak ekonomi yang lebih besar dari ekspektasi pasar.

Pemerintah mempunyai andil besar di tahun 2020 baik dari kebijakan stimulus ekonomi dan rencana reformasi pemerintahan. Adapun *trade-off* yang dilakukan mengakibatkan tingkat hutang Indonesia meningkat, Hal ini dapat menjadi *overhang* setelah beberapa periode kedepan i.e : *crowding-out* sistem perbankan, meningkatnya instrumen cukai/pajak kedepan, dll. Sehingga *recovery* beberapa sektor dapat dibawah ekspektasi pasar.
